[Supplement 411](#) > [Get Involved](#) > High Risk List

Important Warning

Do not rely solely on this list to make a decision about whether or not to use a particular product. You are responsible for comparing the label to the WADA Prohibited List to determine if the product may contain prohibited substances. You are responsible for evaluating each product and deciding for yourself if the product poses an anti-doping or health risk. Before reviewing the high risk list, you should evaluate any given product against USADA's list of "Red Flags" that indicates that the product may pose an anti-doping or health risk.

Disclaimer

By publishing these test results, USADA is not making any claim about whether these products will or will not cause a positive anti-doping test.

The product, batch, and lot tested here may not be a representative example of the entire product run, batch run, or lot of this product. Other bottles in the same batch may contain more or less than what is reported here, and may contain other substances that are prohibited in sport that are not reported here.

USADA does not make any claim about whether these products are or are not appropriately marketed as dietary supplements.

Manufacturers change the formulations of their products extremely rapidly and, at the time of listing, a particular brand name of a product may have had a different formulation than that currently on the market.

This list may contain discontinued products that are no longer sold directly to consumers by the manufacturer but remain available through distributors.

If a product is NOT listed here, that does NOT mean it is safe to take, or is devoid of prohibited substances.

Just because a product is on this list, USADA does not make any statement about whether an athlete should or should not take this product. It is up to the athlete to evaluate each dietary supplement product and decide for themselves whether or not to use the product.

The athlete is strictly responsible for what is in their system, irrespective of how it got there.
